Career Objective

Full Stack JavaScript Developer and final-year CSE student nearing graduation, with hands-on experience in React, Next.js, Node.js, and Express.js. Skilled in building RESTful APIs, implementing authentication, and working with MongoDB/MySQL. Passionate about writing clean, maintainable code and contributing to real-world, scalable web applications.

Education

Bachelor in Computer Science and Engineering
Metropolitan University, Sylhet

January 2022 -Present
CGPA 3.40/4.00

Skills

Programming Language : JavaScript (ES6+), TypeScript, C++, Python

Frontend : Next.js, React, TailwindCSS, Bootstrap, HTML, CSS

Backend : Node.js, Express.js, MySQL, MongoDB, JWT Authentication

Tools : Git, Github, Firebase, Vercel Deployment, Postman

Projects

Bite Share [Live](#) | [Frontend Code](#) | [Server Code](#)

A food-sharing platform that lets users browse, manage, and request food based on availability and quantity. It features secure authentication and a responsive UI for all devices.

- Built a full-stack web application focusing on clean UI, smooth user experience, and reliable frontend-backend integration.
- Built RESTful APIs and handled authentication & protected routes using firebase JWT
- Designed MongoDB schemas and handled CRUD operations
- Focused on performance, scalability, and secure API design

Technologies : React.js, JavaScript, TailwindCSS, Node.js, Express.js, MongoDB, Firebase Auth

URL Shortener [Live](#) | [Frontend Code](#) | [Server Code](#)

A full-stack URL shortening platform that allows users to securely generate, manage, and track shortened links through a centralized dashboard.

- Built a full-stack application using Next.js (App Router) and Express.js with a clear frontend-backend separation
- Implemented JWT-based authentication using HttpOnly cookies to improve security and prevent XSS attacks
- Implemented optimized redirection logic using unique short codes with indexed database lookups

Technologies : Next.js, TypeScript, Node.js, Express.js, MySQL, Tailwind CSS, JWT token

Participations and Awards

Python Programming and Basic Data Science

2024

- Participated in the EDGE Program conducted by the Institute of Information and Communication Technology (IICT), Shahjalal University of Science and Technology, Sylhet

Language : Bangla (native) and Fluent in English
